Detailed Action

This communication is responsive to the amendment and response dated May 18, 2005. Claims 1-6 are presenting for examination.

Allowable Subject Matter

1. Claims 1-6, after further reconsideration and search, are allowed over the prior art of record.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method in which data received at a display device is color corrected based on a particular display device so as to optimize the display data.

The prior art teaches a system for adjusting display characteristics for various types of display device by performing a black point test and then a gamma value is obtained by a correction function based on an input value, and then allowing a user to determine the preferred display characteristic so that the computer may determine the brightness value for each R, G, and B values of the display. (See col. 7, lines 66 to col. 9, line 15 of US patent 5929617 assigned to Ohara). The reference assigned to Edge (US 20020169805) teaches a method of adjusting images based on color response characteristics of a display device associated with any of the client, and then communicates the color-modified image to the client display. See paragraphs 29, 31,

Art Unit: 2676

42, 81 and 83. However, the combination of Ohara and Edge fail to teach the combined features: measuring a display characteristic for each image display device based upon a displayed reference color image; calculating, for each image display device, a color correction parameter, which corrects the color image displayed on the display screen of each image display device, based on the measured display characteristic; and perform color correction on the image data, for each image display device, which represents a color image to be displayed on the displayed screen of a corresponding image display device, using a corresponding color correction parameter from among the calculated color correction parameters (in the manner recited in the claims). As a result, claims 1-6 of the instant application are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
